

Data Science Africa (DSA)

Role: Web Developer

The DSA organization is looking for a web developer to build and maintain its websites. This includes development of easy to use templates for event websites (e.g. conferences and workshops) and maintenance of the main organization website. This role is **part-time** and located **anywhere in Africa** and is supervised directly by the DSA board.

Requirements

For this role, the following skills are essential:

- Solid front end programming knowledge in HTML, Javascript and CSS
- Experience with static site generation frameworks such as Jekyll, Hugo, etc.
- Experience building websites.
- Familiarity with version control tools and platforms like Git, Github and continuous integration (CI) services such as CircleCI, GithubActions, TravisCI etc.
- Familiarity with templating frameworks such as SCSS, SASS etc.

What we offer

DSA is a large collaborative effort across the whole African continent, that is committed to equity, access and empowerment. Please read more about our core tenets at <http://www.datascienceafrica.org>. For this role, we will provide the following:

- Collaborative, open and flexible work environment.
- Impactful and meaningful work.
- Competitive remuneration commensurate with candidate experience
- Mentorship and opportunity for growth and involvement in the larger organization's agenda.

How to Apply

Email a resume and cover letter to the following link: <https://forms.gle/hcyJA1f7tREQELAu6>

In your submission include links to your previous web development work. It could take the form of a GitHub account or direct links to your work.

DSA is an equal opportunity employer that values and promotes diversity and equity.
